Art Unit: 2183

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to architecture based instruction processing, classified in class 712, subclass 200.
- II. Claims 19-26 and 30-31, drawn to processing control for data transfer, classified in class 712, subclass 225.
- III. Claims 27-29, drawn to conditional branching, classified in class 712, subclass 234.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as system for instruction processing based on the specific architecture and limitations set forth in claims 1-18 but lacking the additional limitations set forth in the claims of inventions II and III. Invention II has separate utility such as system for processing control for data transfer based on the limitations set forth in claims 19-26 and 30-31 but lacking the additional limitations set forth in the claims of inventions I and III. Invention III has separate utility such as system for conditional branching based on the limitations set forth in claims 27-29 but lacking the additional limitations set forth in the claims of inventions I and II. See MPEP § 806.05(d).
